Online Options for Today's Students

Today schools and districts face many online education challenges.

BYU High School Suite offers flexible solutions that can integrate with your current online strategy—no matter what it has been—as a one-stop solution or an addition to existing courses in your LMS. Our engaging online curriculum delivers a full range of required and elective content.

Learn why hundreds of U.S. high schools choose BYU High School Suite.

Digital Curriculum Licensing

BYU HIGH SCHOOL SUITE

Creating an online curriculum demands significant resources, including time, financial investment, and effort. This task becomes even more daunting for teachers and school administrators who are not well-versed in the process. Allow your educators to concentrate on what they do best—teaching. We'll handle the curriculum.

BYU High School Suite presents a comprehensive, ready-to-use product. Your school or district can license our digital curriculum tailored to meet your specific requirements. Opt for the solutions that align perfectly with your educational goals:

- **Online Learning Solutions:** Curriculum ready to be taught by your teachers
- **Credit Recovery Solutions:** Mastery-based credit recovery for students to replace failing or low grades
- **Blended Learning Solutions:** A hybrid mix of online coursework and in-person instruction
- **Learning Management System Choices:** Our customizable LMS or yours (Canvas, Schoology, Blackboard, etc.)

Scan to explore
High School Suite.

COLLABORATION

We offer partnership, not pressure. From our first visit through implementation, our consultants will guide you through the best solutions for your school.

FLEXIBLE INSTRUCTION

Our curriculum empowers your teachers to achieve their distinct educational objectives. Moreover, we'll guide you on utilizing modules to tailor content specifically for your classroom needs:

- Core courses already built
- Editable lesson content, assignments, and assessments
- Ability to change Pass/Fail grades

ONLINE CLASSROOM COLLABORATION

Boost student performance by leveraging course wikis, journals, group emails, online discussions, and announcements. As you develop your curriculum within our provided framework, feel free to incorporate additional technologies. Our tech support team is on standby to assist you in using the tools at your disposal to craft the most effective courses for your students.

BYU High School Suite Benefits

AFFORDABLE DIGITAL CURRICULUM

Low-Cost Enrollments: Significant savings compared to other online curriculum providers.

No Teacher Setup Time: Adaptable course content can get your online teachers up and running in no time.

FAST SETUP, GREAT SUPPORT

Turnkey Solutions: You can supplement or create online courses with a prebuilt, customizable curriculum.

Technical Support: Dedicated support staff are available during business hours to help you set up your access.

REDUCED SCHOOL EXPENSES

Licensed Content: Reduce teachers' non-teaching time and load, keeping them in contact with students.

Student Retention: Keep your students at your school by offering an online program with more course options and flexibility.

Teacher Retention: Increase your school success with less teacher burnout. BYU High School Suite

helps overcome the stress of course development, maintaining student records, and determining subjects to reteach.

FOCUSED ON SUCCESS

Proven Curriculum: Hundreds of schools around the United States have implemented BYU High School Suite to expand online options for their students.

Values Framework: As of fall 2022, new High School Suite course revisions include built-in Knowledge, Skills, and Attributes (KSA) framework to help students develop essential abilities for lifelong success.

Based on course performance, students can earn skills microcredentials that can be shared on job applications, résumés, networking apps, and so on.

For instance, our Tenth-Grade English, Part 1 (ENGL 045), hones Creativity and Courage. Through four modules and eight assignments, students deepen their understanding of courage and can obtain a shareable digital microcredential in "Creativity: Openness and Courage to Explore."

Online Learning Solutions

COMPLETE, CUSTOMIZABLE CURRICULUM

Embrace our extensive suite of online curriculum, featuring over 200 high school courses, and tailor it to your students' unique needs. Teachers have the flexibility to utilize our curriculum as-is or modify it to align with local standards and requirements. Our objective-based, modular lessons are designed for ease of use by novice educators yet offer extensive customization options for seasoned teachers. The interactive media and lucid lesson content captivate and engage students.

BYU High School Suite provides detailed analytics to streamline personalized learning. Alongside our standard for-credit courses, we also offer credit recovery courses to support diverse learning paths.

ONLINE PROGRAM CONSULTATION

Whether you're enhancing an existing online program or initiating a new one, BYU High School Suite is your all-in-one solution. Supplement or fully replace your curriculum with our offerings and benefit from a customizable learning management system that ensures a swift setup. We provide not just curriculum but also program consulting, training, and support services tailored for schools and districts.

Credit Recovery Solutions

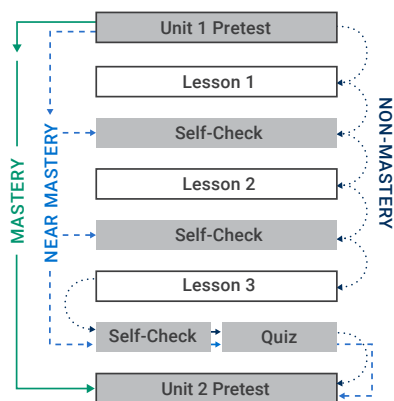

IMPLEMENT A CREDIT RECOVERY PROGRAM

Many students need a mastery-based learning path that adapts to their individual needs. Every course in the BYU High School Suite curriculum can be leveraged to help students recover lost credit.

As shown in the following illustration, students take unit pretests to determine the topics they have mastered and where they are deficient. These assessments identify students' proficiency levels, allowing for a tailored learning path—mastery, near mastery, or non-mastery—ensuring they focus only on areas needing improvement. This method minimizes instructional demands on your teachers while maximizing student learning efficiency.

CREDIT RECOVERY PROGRAM CONSULTATION

Our academic outreach consultants understand the unique needs of a credit recovery program and will help you identify how best to meet the needs of your students. Working with your consultant, you'll find that aligning your credit recovery program with your school's mission and goals is easier than you might expect.

Blended Learning Solutions

DIGITAL CLASSROOM CURRICULUM

By blending High School Suite courseware with classroom teaching, teachers can assign students to work independently and free up time to work with students who need more individualized support.

Since the pandemic, many schools have found that students thrive in blended (or hybrid) classrooms and enjoy the mix of in-person instruction with online coursework.

Online assignments and assessments provide innumerable benefits, such as making grading easier, facilitating parent observation, and providing student participation opportunities, which may take more work on paper and in person. Students are now accustomed to accessing their courses in an LMS, whether the course is 100% online or held in person. High School Suite makes adopting blended learning more manageable than ever.

BENEFITS OF BLENDED LEARNING

In addition to offering benefits to students, parents, and teachers, blended learning boosts schools and districts in the following ways:

1. **Student Retention:** Students who seek flexible online education stay with their local school, completing most of their coursework online. This allows the district and school to keep homeschooled and/or virtual high school students and retain the associated funding.
2. **Accommodation of Student Needs:** Many students still want to participate in school clubs, dances, sports, and other activities. Blended programs allow them to study on their own while still being able to access all the social activities the school offers.
3. **Robust Analytics:** Standards-based learning objectives help teachers assess students' learning outcomes and topic mastery. For example, the teacher dashboards can monitor student pace and progress. The gradebook can provide notifications to address learning deficiencies early on.
4. **Financial Savings:** By offering blended education programs, schools and districts save the overhead costs of a full-time, on-campus course, including facilities costs, administrative time, teacher labor, and other expenses.

“

One of the standout features of BYU's curriculum is its adaptability. It allows us to tailor the learning experience to each student, enabling them to revisit and reinforce areas they initially struggled with.”

—Todd Quarnberg, Principal
Herriman High School

“The content of the courses are very well planned and produced. The method can draw the attention of high school students well. Overall, I think they are very good courses.”

—Simon Post,
Director of Secondary
DaVinci Academy of
Science and Arts

LMS Setup Choices

If your school or district already has an existing learning management system (LMS) and needs to fill curriculum gaps, our complete portfolio of more than 200 courses is ready to integrate within days, not months!

Your content, learning activities, and assessments are delivered to any compatible system via the Publish Anywhere LTI tool. This allows our courseware to be integrated into your school's LMS without the headaches associated with teachers and students accessing multiple learning management systems.

BENEFITS OF ONE LMS

Instant courses: BYU High School Suite course content can be ported into your LMS quickly and easily.

Activities: Courses include and support multimedia, assessments, objective mapping, and so on.

One central portal: Grade work, give feedback, and customize content within your existing LMS.

Student simplicity: Provide one-LMS focus to students via easy enrollment.

Support and Training

PROGRAM DEVELOPMENT CONSULTING

Our support team is dedicated to ensuring the success of your BYU High School Suite experience. We aim to be an exceptional partner by providing robust technical support, comprehensive training, and adapting to the latest educational trends. We're committed to the well-being of your teachers and students, offering outstanding customer support throughout your journey.

Our consultation services involve collaborative meetings with your leadership team to assess your educational needs and goals. We'll assist in planning your program's rollout, establishing rights and policies, and setting benchmarks for success. Should you opt for our LMS, it can be personalized with your school's branding and populated with your selected licensed courses.

PEDAGOGICAL TRAINING

Enhance your teaching staff's online proficiency with our Online Teacher Training course. Designed for in-person educators transitioning online, the course covers essential topics like classroom management, student engagement, interactive teaching, and impactful feedback.

LMS TRAINING

Your program administrators and teachers can receive online technical training to help you maximize the benefits of your LMS. Part of this process includes learning about available courses and identifying ways they might be used for credit recovery and other needs.

ADMINISTRATOR TRAINING

Our team can also teach your lead teacher or principal how to use the LMS analytics to identify effective online instruction. You can easily evaluate teacher performance by observing overall student performance.

ONGOING TRAINING

Our dedicated technical support and academic outreach teams are at your service for ongoing training. With your BYU High School Suite subscription, we're committed to facilitating continuous improvement and achieving the objectives set during your program development consultation.

“

We have been using BYU for a couple of years now. Among my favorite features are the number of course options that BYU has and its ability to be integrated into Canvas, our main LMS.”

—Catherine Ashbridge, Teacher
Trivium Charter School

“We appreciate the simplicity of the student enrollment process and the straightforwardness of tracking their progress. Our students also value the self-paced learning and the opportunity to refine their work.”

—Jennifer Hartman, Counselor
Green Canyon High School

“We have chosen to partner with BYU for the outstanding curriculum that it provides and the fantastic support team that comes with it. I appreciate how the courses are outlined and the tools in place, translation, read-aloud, etc. It is also nice to have updates to the curriculum as needed to be provided to us.”

—Jocelyn Hobbs, Principal
Sugar-Salem Online School

Academic Outreach

BYU High School Suite is a nonprofit program, ensuring our consultants prioritize your best interests without any commission incentives. We're committed to helping you find effective solutions for your students.

Our dedicated consultants are available year-round for in-person visits or online meetings. Feel free to contact your area's consultant to explore available options.
